

## Solar Panel Pre-plan Icons

### Field Visualization

Responder360 now has solar panel icons available for use in occupancy pre-plans.

A solar panel grid with a small sun symbol is utilized for Solar Panel installation locations

The NFPA standard symbol for shutoffs with "PV" for photovoltaic is utilized for Solar Panel Shutoff locations

### Adding Icons to Pre-plans

Users with access to the Agency Administrator, Occupancy Administrator (Full), or Occupancy Administrator (Limited) Role(s) can edit map shapes by signing in at <https://admin.responder360.com> and selecting Occupancies from the Main Menu. By selecting any occupancy record and picking "View/Edit Map Shapes", the user can update the pre-plans seen on the responder map.

The Solar Panel icons are available from the symbols menu in the pre-plan editor window, under Access and Shutoff locations.
